

Maleic Anhydride pallets statement

Product name	Maleic Anhydride
---------------------	-------------------------

We hereby declare that there is no quality related difference between liquid and palleted form of Maleic Anhydride, produced at **MOL Plc.** site.

Maleic Anhydride pallets should be stored in a well-ventilated, properly covered, dry area away from any sources of ignition, open flame, and strong oxidising agents. Maleic Anhydride extremely hygroscopic and should not be exposed to atmosphere and moisture as it leads to formation of Maleic acid.

The recommended shelf life is maximum 3 months under the storage conditions mentioned above.
